

Table 1 : Users

The screenshot shows the phpMyAdmin interface for the 'blog_site' database. The 'SQL' tab is selected, and the query editor contains the following SQL code to create the 'users' table:

```
1 CREATE TABLE users (  
2   user_id INT AUTO_INCREMENT PRIMARY KEY,  
3   username VARCHAR(50),  
4   email VARCHAR(100),  
5   is_active BOOLEAN  
6 );
```

Below the query editor, there are buttons for 'SELECT *', 'SELECT', 'INSERT', 'UPDATE', and 'DELETE', along with 'Clear', 'Format', and 'Get auto-saved query'. There is also a checkbox for 'Bind parameters' and a 'Bookmark this SQL query' field. At the bottom, there is a 'Delimit' dropdown set to semicolon, and checkboxes for 'Show this query here again', 'Retain query box', 'Rollback when finished', and 'Enable foreign key checks' (which is checked). A 'Go' button is at the bottom right.

The screenshot shows the phpMyAdmin interface for the 'blog_site' database. The 'SQL' tab is selected, and the query editor contains the following SQL code to insert data into the 'users' table:

```
1 INSERT INTO users (username, email, is_active) VALUES ('alex', 'alex@email.com', true);  
2 INSERT INTO users (username, email, is_active) VALUES ('mia', 'mia@email.com', false);  
3
```

Below the query editor, there are buttons for 'SELECT *', 'SELECT', 'INSERT', 'UPDATE', and 'DELETE', along with 'Clear', 'Format', and 'Get auto-saved query'. There is also a checkbox for 'Bind parameters' and a 'Bookmark this SQL query' field. At the bottom, there is a 'Delimit' dropdown set to semicolon, and checkboxes for 'Show this query here again', 'Retain query box', 'Rollback when finished', and 'Enable foreign key checks' (which is checked). A 'Go' button is at the bottom right.
